#### **TABLE OF CONTENTS**

1. COSMIC SPACE PATROL	
2. GAME PLAY	
3. OPERATING YOUR SPACESHIP	
4. CONSOLE CONTROLS	
5. SCORING	
6. GAME VARIATIONS	
7. HELPFUL HINTS	
8. GAME SELECT MATRIX	

On a quiet serene evening the Cosmic Space Patrol sets out for the usual night cruise through the boulevards of space. This beat was always the same; calm, no action and no excitement. For some reason this night feels different. Shortly before 0200 hours some form of intergalactic material is sighted through the visual particle counter. The material is too large a

mass to measure. It's drifting closer, Lookout, it's a giant asteroid boulder and it's headed straight for the Cosmic Spacecraft. The only boulder or destroy it. Destroying it doesn't mean just breaking it up, it means vaporzing it. Small asteroid boulders are equally as fatal as large ones.

#### ATARI\*GAME PROGRAM\*INSTRUCTIONS

Whew, the boulder just missed coliding with the Cosmic Spaceraft, but sudderly the Cosmic Space Patrol lind themselves surrounded by thousands of the deady asteroids. The Cosmic Space helicity spaceraft and spare their spaceraft and spare their with prior to tropdoes, hyperspace, shields, and tilp control.

The Cosmic Space Patrol is highly trained to handle this situation. Could you do as good a job as the Cosmic Space Patro? How would you protect yourself if you were caught in a deadly asteroid belt? This is your big chance to fly throught the dimensions of space and fend against asteroid boulders. The longer you survive, the more space hazarde you'll encountly.

#### 2. GAME PLAY

The object of the game is to destroy as many asteroid boulders as possible and keep your ship in space as long as possible. Use your Joystick Controller to maneuver your ship through space and press the red controller (rip button to shoot photon torpedoes at the asteroid boulders. When an asteroid is hit, it

may just break up into smaller boulders, or it may be completely pulverized. In some game variations you'll face additional space hazards such as satellites and UFOs (Unidentified Flying Objects); both of which may be firing torpedoes back at you.

#### 3. OPERATING YOUR SPACESHIP

4

Use your Joystick Controller with this ATARI® Game Program cartridge. Be sure to plug the controller cables firmly into the lacks at the back of your Video Computer System Game. Hold the controller with the red fire button to your upper left toward the television screen. Use the LEFT CON-TROLLER jack for one-player games. See Section 3 of your owner's manual for further details.

Use the Joystick Controller to aim tornedoes at the asteroids. Move the Joystick right to rotate the ship clockwise; move it left to rotate the ship counterclockwise. Push the Joystick forward to thrust (propel) the ship through space. (The ship moves only in the direction it's

Pulling the Joystick down causes the ship to perform different functions such as hyperspace, shields, or flip (see Section 6, GAME VARIATIONS). After aiming the spaceship with your Joystick, press torpedoes at the asteroid boulders. Continue to press and release the fire button as fast as possible to quickly destroy all of the asteroids.

If the game variation you're playing includes satellites and UFOs, use your Joystick to aim and press the fire button to shoot torpedoes at them just as you would for the asteroid boulders

### 4. CONSOLE CONTROLS

#### GAME SELECT SWITCH

To select an ASTEROIDS\*game, press down the game select switch, (See Section 8, GAME SELECT MATRIX to choose the game you wish to play.) The game number and the number of players appear at the top of the screen. The game number is on the left: the number of players is on the right as shown in Figure 1.

Figure 1

#### ATART GAME PROGRAM INSTRUCTIONS

#### GAME RESET SWITCH

number, press down the game reset switch to start the action. Each time game reset is pressed down the game starts over. After the game starts, the score appears at the top of the screen as shown in Figure 2.

Figure 2

NOTE: To change game numbers quickly, hold down game select and game reset together.

#### DIFFICULTY SWITCHES

The ASTEROIDS game has two difficulty levels, a and b. The b level is normal game play for beginning players. The a level offers a bigger challenge with the addition of UFOs satellites (see Figures 3 and 4).

Figure 3

Figure 4

UFOs are tough to hit, but each one is worth 1000 points. (See Section 5. for SCORING )

Satellites are larger and easier to destroy. UFOs and satellites may be firing back at you, so be on the

lookout for their stray artillery. UFOs do not attack until you have reached over 15 000 points. When satellites and UEOs speak up to attack you, you'll hear their engines. The satellites have a low pitched engine sound and the UFOs have a

higher nitched sound

#### TV TYPE SWITCH

Set this switch to color if your television is color or to b/w if your television is black-and-white. Setting this switch to h/w will not affect a color television.

#### 5. SCORING

Points are determined by the size of the asteroid boulders. Obviously, the smaller boulders are harder to hit and therefore worth more points. With each game or turn you have four spaceshins. You can earn extra spaceships by scoring high as indicated in the GAME SELECT MATRIX

Points are scored as follows: SMALL ASTEROIDS 100 POINTS MEDIUM ASTEROIDS 50 POINTS LARGE ASTEROIDS 20 POINTS 200 POINTS SATELLITES 1000 POINTS

#### 6. GAME VARIATIONS

ASTEROIDS includes 66 game variations for 1 or 2 players.

FAST/SLOW FAST/SLOW (F/S) refers to the

#### speed that the asteroids travel. LIVES

LIVES is a feature which allows you to earn extra spaceships. Game variations provide you with an extraship every 5000, 10,000, or 20,000 points, depending on the game number you choose. The tougher game variations don't provide any extra spaceships. (See Section 8. GAME SELECT MATRIX for extra ship lives.) You'll hear a beeping sound when an extra snaceshin is

#### **FEATURES**

Depending on the game variation you choose, you may be able to save your spaceship from destruction by using one of the game features of ASTEROIDS

#### Hyperspace

Hyperspace (H) is a feature offered in Games 1 through 8 for one player and Games 34 through 41 for two players. By moving the Joystick down, or towards you. hyperspace makes your spaceship disappear in space and reappear at some other place on the screen. Hyperspace is helpful as a quick getaway when an asteroid boulder is headed toward your spaceship.

but it may also be a hindrance if your spaceship reappears in the path of an oncoming asteroid houlder

#### Shields

Games 9 through 16 for one player and Games 42 through 49 for two players allow you to protect your spaceship by surrounding it with protective shields (SH). Pull your Joystick back towards you to put up shields, but don't use shields for more than two seconds or your spaceship will blow up.

In game variations featuring flin (FL), you can flip your spaceship around 180 degrees which aims it in the opposite direction. Flip is a fast

way to attack asteroids coming from behind. Flip is a feature in Games 17 through 24 for one player and Games 50 through 57 for two players.

Games 25-32 (one-player) and Games 58-65 (two-players) have no optional features (W). This makes these game variations more challenging and you must depend solely on your quick skill and coordination.

YOUNG CHILDREN'S VERSIONS Games 33 and 66 are easy versions for young children. These games feature slow asteroids. hyperspace, and an extra ship with

each 5000 points.

#### 7. HELPFUL HINTS

After playing ASTEROIDS several times you'll discover which techniques work best for you. Here are some that the space cadets at ATARI found most helpful.

1. When the screen becomes clear of asteroids (just before a new group of large asteroids anpears), try to avoid placing your spaceship close to the right or left edge of the screen. New asteroids almost always begin from these edges.

- 2. It is often helpful to remain in the center of the screen throughout the game, aiming your spaceship right and left or in a cir-
- 3. If you're close to earning an extra ship, and your spaceship is about to crash, you may want to cause your spaceship to collide with a small asteroid, UFO, or satellite. You'll earn points even if you crash, and this may be just enough points to earn that extra
- 4. Try to hit the faster and smaller asteroid boulders. This will give you more protection and more points.

#### 8. GAME SELECT MATRIX

HOW TO READ THE GAME SELECT MATRIX

SPEED

S = Slow F = Fast

EXTRA LIFE 5 = 1 Extra Ship Every 5.000

Points 10 = 1 Extra Ship Every 10,000

20 = 1 Extra Ship Every 20,000 Points

N = No Extra Ships

H = Hyperspace

SH = Shields FL = Flip

FL = Flip W = Without Features

#### ATARI® GAME PROGRAM™ INSTRUCTIONS

# ATTENTION: ATARI® ASTEROIDS™ Game Program™ cartridge owners:

This ATARI ASTEROIDS cartridge is very similar to the famous ATARI coin-operated ASTEROIDS game, but you may notice some game play differences. You will see that the game playfield on your television screen is smaller and has borders on all four sides. The dark border on the left side of the screen does not interfere with game play. It is a programming characteristic of all ASTEROIDS cartridges. The size of the border varies on different televisions. You may also notice that as asteroids disappear from the top, bottom,

right or left side of the playfield, they "wraparound" and reappear at the opposite edge of the playfield.

If you are playing the ASTEROIDS game in the "a" difficulty level, UFOs will sometimes begin to attack after you have reached 7500 points, and they will always attack after you have over 15,000 points.

We wish you lots of luck in defending your spaceship, and hope you have many hours of fun playing the ATARI ASTEROIDS game.
