THE FREEZE IS ON!

A chilling development! **Mr. Freeze**, whose favorite hobby is icing his foes, er, foes, has a scheme to make **Gotham City** a cooler place . . . 30 below cool! He's building a massive ice cannon, and he's not about to let anything go wrong . . . like having **Batman** and **Robin** meddle where they're not wanted.

So he's "arranged" the escape of three of Gotham City's evilest felons from **Arkham Asylum**. Once on the loose, their diabolical duty is to keep **Batman** and **Robin** occupied . . . while the Impresario of Ice completes the global glaciation!

Stage 1: Happy Birthday to Me

The **Gotham City Convention Center**, site of the **Gem Expo**, is gripped in a power blackout. Widespread looting has been reported, and all

morning **The Joker** has been calling the power company, singing "Happy Birthday to Me." It's time for **Batman** and **Robin** to deliver the punch line.

Stage 2: Two-Sided Story

The **Gotham City Blimp Tower** has been commandeered for the refueling of the top-secret **XR22 Battle Blimp**. This airship is outfitted with a powerful experimental

weapon, called the **Sonic Disrupter**. **Two-Face** and his gang of thugs are laying siege to the tower, aided by miniature remote-controlled helicopters that are armed to the teeth. **Batman** and **Robin** must double-time it to the site and save the blimp at all cost.

Stage 3: Tea Time

Commissioner Gordon has been kidnapped by **The Mad Hatter**, who is holding him hostage at Wonderland Studios. The tea-totalling kidnapper has demanded

\$1 million in ransom, to be delivered by Batman. Who knows what lurks on the other side of the looking glass?

Stage 4: Snow in July?

While **Batman** and **Robin** were attending to the rescue of Commissioner Gordon, someone broke into the University lab. Now AU13, the special alloy used to store super coolants, is

missing. Super coolants? Sounds like the chilling work of . . . **Mr. Freeze!**
